

Project "Georgia on European Way: Effective Model for DCFTA and SME Strategy Implementation" Closing Conference

DCFTA Implementation: Partnerships, Push-backs and Potential

May 8, 2019 Tbilisi, Georgia

Venue: Holiday Inn Tbilisi, located at 1, 26 May Square

Since signing the Association Agreement (AA) with the EU in 2014, and subsequent initiation of the Deep and Comprehensive Free Trade Area (DCFTA), Georgia has come several steps closer to integration into the European market. Yet, the DCFTA represents both an opportunity and a challenge for Georgia's small and medium-sized enterprises (SMEs). In addition to providing a boost to exports and foreign direct investment, it could catalyse institutional and regulatory reforms, helping align Georgia's domestic standards with those of the EU single market. On the other hand, the DCFTA requires changes both in the ways Georgian producers operate and in the ways their activities are regulated. Until now, it has not been clear to what extent Georgian SMEs are willing and capable of adapting to these new, more stringent requirements.

This conference will present results of the two-year project "Georgia on the European Way: Creation of Effective Model for DCFTA and SME Strategy Implementation" (launched in April 2017), funded by the European Neighbourhood Instrument of the European Union and co-funded by Lithuanian Development Cooperation and Democracy Promotion Programme and the Slovak Official Development Assistance - SlovakAid. The project addressed the lack of awareness about opportunities provided by the DCFTA Agreement between Georgia and the EU. It sought to increase the role of Georgian civil society organizations (CSOs) in a nation-wide DCFTA/SME communication campaign and their capacities to assist local small and medium entrepreneurs in their preparations to access the EU single market.

The conference will present Project results, assess the challenges that Georgian SMEs are facing in terms of DCFTA and SME strategy implementation, and good practices for CSOs to become "campaign agents" and inform a significant portion of the population about the benefits of the AA/DCFTA, as well as advocate for reforms and improvements to the implementation process. Conference participants will also discuss recommendations for policy reforms developed during the two-year consultation process in all 10 Georgia's regions — including the proposals of the local and central councils, and the good experiences of Lithuania and Slovakia.
